Revolutionize Dentistry.

The XCell Objective

Dr. Jonathan Abenaim has made it his mission to revolutionize the dental profession by founding the proprietary XCell Dental Implant Process. His unique method offers a comfortable, lasting and affordable option for smile replacement. Prior to the development of the XCell Dental Implant Process, the traditional route involved longer healing and treatment time, less dependable results and a greater financial commitment.

Dr. Abenaim has traveled the nation sharing his strategies on improving relationships between corporate dental professionals and dental teams, as well as pushing dental companies to care about their products and their mission.

Dr. Abenaim's goal is for each person to leave the mini residency feeling prepared and motivated to better their career and dentistry as a whole.

The XCell Approach

The XCell Mini Residency Program offers a unique educational experience. You will be able to see the XCell Process in real-time, including a full surgery arch or double arch surgery and a restorative scan. You will be a part of a live consultation with tips on how to close them. You will also receive XCell marketing training from our team of experts.

At the end of the residency, you will be awarded a certificate of having completed the full digital workflow.

The Future of Dentistry

Technology has transformed dentistry. You will follow Dr. Abenaim to observe his XCell Dental Implant Process and the full digital workflow behind it. This includes live surgery, scanning, and full-arch restoration. You will receive hands-on training from Dr. Abenaim in the following areas:

- 3Shape visit, full smile design and implant studio training
- Green State zirconia finishing with MDT training
- Monolithic full arch zirconia pink layering
- MiYO white enhancements
- One-on-one training for full arch consultations
- Body language training
- Hyperdent CAM training
- Printing and finishing a full arch temporary

The Trust Factor

As a dental practice owner, you're responsible for ensuring patients receive the care they need while maintaining a successful business. In this invaluable book, Dr. Abenaim uncovers the secrets to success and identifies areas of opportunity to keep you moving forward. In it, he draws on his own experience. After purchasing a practice, Dr. Abenaim lost 30 percent of his patients within six months, despite the high quality care provided by his team. He made a realization that success is dependent on team unity, and that a transformation requires cultivating trust.

If you are looking to increase productivity, build trust among your patients and your team, and learn how to nurture a forward-thinking culture, The Trust Factor is for you.

Dr. Abenaim's Philosophy

Learning from experience is the best way to immerse yourself in today's fast-paced world of digital dentistry. The XCell Mini Residency Program gives you an opportunity to connect with professionals that can share what works based on real experience. You can choose to ignore the advancements in dentistry, or you can embrace change, educate yourself and your team, and learn how to improve practice efficiency, patient comfort, and case acceptance.

Revolutionize Dentistry.

Testimonials

Our success is a reflection of your success.

It really kind of sparked our interest because we have a lot of digital equipment in our office. We're trying to stay on the edge of what's going on in dentistry. We see the value of it.
– Jonathan H.

It's nice being able to see it from what we're doing clinically, and then what goes through to the lab so we can have a better viewpoint of what we need to capture.
– Audrey C.

Awesome course. Honest course. All the different software, and trying to figure out how this all comes together is very important.
– Jason C.

About Dr. Abenaim

Dr. Jonathan Abenaim, DMD is the founder of The Smile Syllabus Training Institute. With more than a decade of experience, Dr. Abenaim loves sharing his knowledge and strategies to advance and transform dentistry.

Dr. Abenaim graduated from the University of Pennsylvania School of Dental Medicine with honors in Prosthetic Dentistry, Endodontics, and Pain Management. He was honored with the E. Howell Smith Award in Prosthetic Dentistry, and holds Fellowship and Diplomat status with The International Congress of Oral Implantologists.

He is also the author of the book *The Trust Factor*, a valuable resource for dentists looking to achieve a balance between managing superior patient care standards, while maintaining a profitable and successful business.

Dr. Abenaim lives in New Jersey with his wife and their four children. He has a private practice in Hawthorne, NJ.
